

# CAM COLE

Cam Cole is probably the heaviest one-man band in the world.

His story so far is that of an incredible journey from the streets of London to stages all around the world. Starting out as a busker on every street corner that he could play on without getting arrested by the local council, Cam's videos went viral on social media, earning him a loyal fanbase, millions of streams, a cameo in Emmy winning TV show "Ted Lasso" and subsequent tours and festival slots across the UK, Europe, Australia, USA, Canada, Mexico etc, selling out club shows in cities he had never been in before.

Now with hundreds of gigs, 3 albums and a documentary made about him under his belt Cam has made the difficult jump from street musician to international touring artist without losing the core of what made him unique in the first place. Building on the wall of sound he conjures all by himself with just a guitar and his trusty Farmer Footdrums, Cam has built a show that fuses blues, folk, grunge, stoner rock and metal. Add to that some circus elements from his crew New Age Collective and you got yourself a rock & roll experience truly unlike any other.
